**SEALASKA CONSTRUCTORS SELECTED FOR AGC'S SAFETY TEAM**

**Bellevue, Washington, June, 2011** – Sealaska Constructors, a turnkey design-build general contractor, was recently selected to participate in the Associated General Contractors' Safety Team. To qualify, AGC's safety professionals perform a detailed review of a contractor's jobsite safety policies and procedures to ensure their program meets industry safety standards. Sealaska Corporate Safety Director, Mark Ressler, states, *"AGC's safety audit checklist had over 200 criteria we had to meet to be eligible for the team. We appreciate this kind of rigor. We are proud to be a part of a program that is as dedicated to safety as we are."*

The workplace safety program was created by AGC in 1990 to promote safe work environments that meet and exceed industry standards. As a member of the AGC Safety Team, Sealaska Constructors receives Washington State Department of Labor and Industries and OSHA recognized jobsite audits, consultation services and healthy and safety training resources.

**About Sealaska Constructors, LLC (SCL)**

Sealaska Constructors, LLC is a full service, small business **8(a)** certified general contractor. SCL operates three business units – General Construction, Civil & Infrastructure and Environmental Services. SCL is headquartered in the State of Washington and has regional offices in Indiana, California, Oregon, Missouri, Louisiana, Oklahoma and Texas. In 2009, SCL became a wholly owned subsidiary of **Sealaska Corporation, based in Juneau, Alaska and one of the thirteen original Alaska Native Regional Corporations**. Sealaska is a Native Corporation owned by over 20,000 tribal member shareholders and guided by traditions of environmental stewardship and positively impacting its native communities.

Sealaska Corporation is the largest private landowner and the largest for-profit private employer in Southeast Alaska. It is a diverse company with investments in **forest products, construction, machining and fabrication, environmental remediation, information technology, plastics injection molding and manufacturing, global logistics, wood products and financial markets**.
